

# Continental Underfloor Heating

## Installer Profile:

- Continental is a UK market leader in underfloor heating systems. They design and supply systems across the UK for:
  - Refurbishments
  - New builds
  - Commercial properties
  - Health sector properties
  - Low energy housing
- As the only UK supplier of both warm water and electrical system, the company advises customers on the appropriate technology to use for their specific project.
- Continental warm water systems are suitable for all types of heat source including:
  - Ground source heat pumps
  - Solar
  - Oil
  - Gas
  - Wood chip / pellet
- Continental systems can be easily fitted into most properties and are designed to be compatible with all types of floor construction and floor coverings including:
  - Stone / tiles
  - Wood / engineered wood / laminates
  - Carpets
- All Continental systems are designed to BS EN 1264, have been manufactured under ISO9001, and are tested to all the relevant UK and European standards. The company is recognised for its high level of customer service and ability to provide plain English advice.
