

Trenowin Independent Energy

Installer Profile:

Our Mission Statement:

- Provide accurate and comprehensive information about renewable energy sources.
- Provide the best renewable energy products for our clients.
- Provide excellent service to our customers.
- Install our products to the highest possible standard.
- Provide our service at an affordable price so that more people can enjoy the benefits of renewable energy.

The Directors:

- **Dr Matthew Trehwella:** Matthew Trehwella has a PhD in astrophysics and spent three years conducting NASA funded research with the Jet Propulsion Laboratory (JPL) in Los Angeles, California. During this time Matthew became interested in advances in space technology and how it is becoming affordable for the general public in the form of solar energy. Matthew returned to his native Cornwall in 2000 to work for the family business Causeway Trading Group.
- **Dr Kay Trehwella:** Kay Trehwella has a PhD in biology and is a keen environmentalist. She completed her PhD with the Forestry Commission in Scotland and then worked for the Pure and Applied Biology department at Cardiff University for several years. She became interested in alternative energy sources while teaching science in California.
- **Mr Christopher Trehwella:** Chris Trehwella has over thirty years business experience in the building industry. His company, Causeway Trading Group Limited, became a household name as CTG Windows and was built on the quality of service and products it provided. Products from CTG have brought energy savings to thousands of homes in Cornwall.

Case Studies:

1. Trevalgan Touring Park. 18 Schott panels to provide hot water for showers and washrooms during the season and heat adjacent property during the winter.
2. Domestic - Bodmin Area. 2 Schott panels to provide domestic hot water for 2 people.
3. Swimming Pool - St. Ives area. 4 Schott panels to heat a swimming pool. There was no South-facing roof available so panels are mounted on a frame.

Services / products on offer:

Currently: Solar Thermal Panels.

Upcoming: Wind Turbines and Air-Source Heat Exchangers.

LCBP accreditation reference no. 2127886
