

## **LETS Get Warm Partnership**

This is a multi partner project managed by award winning Cornish charity Community Energy Plus. Other partners include Restormel Borough Council, British Gas and the Eaga partnership.

Targeting the private rented sector of properties with more than one dwelling in Newquay, it provides free insulation measures such as cavity wall and loft insulation. Properties without heating systems will also be assessed for grant help.

Landlords in the area will be written to by Restormel Borough Council in the first instance with the Community Energy Plus outreach team on hand to provide follow up assistance to landlords and tenants.

People can assist with the delivery of the project by promoting the scheme to any clients or contacts who are landlords or tenants of privately rented properties with multiple dwellings in Newquay. For more information please phone FREE on 0800 512012.
